The Fund invests in Japanese companies with exceptional management, trading at an attractive price. Individual stock selection is based on rigorous, on-site research and focuses on factors such as market growth potential, management quality, earnings quality and balance sheet strength. The Fund seeks arbitrage opportunities between a company's fundamental value and its market price. The portfolio selects just the managers' best ideas and has a concentrated number of holdings.

About Hennessy

The Hennessy Select Series of Funds are actively managed and each employs a seasoned sub-advisor that we believe to be a highly qualified category expert. The Hennessy Funds follow a consistent and repeatable investment process, and all of our portfolios are team managed. We strive to provide products that investors can have confidence in, knowing their money is invested as promised, with their best interest in mind.

Investment Objective

The Hennessy Japan Fund seeks long-term capital appreciation by investing at least 80% of its net assets in equity securities of Japanese companies.

Small and medium-capitalization companies tend to have limited liquidity and greater price volatility than large-capitalization companies. Investments in foreign securities involve greater volatility and political, economic and currency risk and differences in accounting methods. The Fund's composition and sector weightings are shown as a percentage of the Fund's total net assets. Portfolio composition and sector weightings are subject to change at any time and should not be considered a recommendation to buy or sell a particular security. The Russell/Nomura Total Market Index is a market capitalization-weighted index of Japanese equities. The Tokyo Stock Price Index (TOPIX) is a market capitalization-weighted index of all companies listed on the First Section of the Tokyo Stock Exchange. The Russell/Nomura Total Market Index and TOPIX indices are presented in U.S. Dollar terms and take into account reinvestment of dividends. One cannot invest directly in an index.

* Beta is a measure of a portfolio's sensitivity to market movements (as represented by the TOPIX). The index has a beta of 1.0. A beta of more (less) than 1.0 indicates that a fund's historical returns have fluctuated more (less) than the index.
